

Callida joins the Asite Ecosystem as Value-Added Service Reseller for the European Market

Provider of construction project management solutions, Callida, will assist Asite with their expansion into the Czech Republic, Poland, Slovenia, and Slovakia markets.

Czech Republic, Europe (November 2020) Asite is delighted to announce that Callida, construction project management solution provider, joins the Asite Ecosystem to advance the growth of the Asite Platform into the European market.

Callida will act as a Value-Added Reseller for the Czech Republic, Slovakia, and other European markets, helping a magnitude of organizations across the construction industry to streamline their complex projects in order to help them build better.

Rob Clifton, Asite SVP for UK and Europe said:

“Asite is excited to open up this new and exciting growth market with Callida as a partner.

Callida has been providing complete construction project management solutions for over eight years now. Their experience and expertise in supplying and implementing SaaS platforms to the construction industry is second-to-none and what makes them an excellent partner to help evolve the usage of the Asite Platform globally.

Our partnership will help the Czech construction industry to build better; a journey I’m thrilled to be a part of.”

Pavel Hanus, Business Development Manager at Callida said:

“BIM is widely adopted and supported by organisations in the construction industry and the government within the Czech Republic. The digitalization of the construction industry has seen a surge in the last few years and is set to continue with the pandemic increasing the requirement for digital technologies and other initiatives, including the mandatory use of BIM for above-limit contracts as early as 2022.

At Callida, we see BIM as a promise for the future; BIM will forge enhanced construction and processing of the entire building lifecycle. Our partnership with Asite is a testament to this. Asite’s global reach, extensive experience, and comprehensive solutions propel organizations into their digital transformation journey, offering the most advanced digital engineering solutions in the industry.

Callida’s market expertise and reputation in providing Czech organizations with information systems, including the ability to work with BIM models in IFC format, will assist Asite in expanding the use of the Asite Platform on construction projects across the world.”

Through partnering with Asite, Callida will elevate the Asite Platform and provide organization’s in the construction industry with comprehensive project management solutions they will use to enhance collaboration across the asset lifecycle.

Asite Project Portfolio Management (PPM) will connect dispersed project teams and systems, streamlining communication at all levels of a project.

As part of the PPM family, the Asite Common Data Environment (CDE) will provide advanced document, BIM, field, and reporting management solutions, all from one central location. Project teams will benefit from ensuring they are working on the most up-to-date data, and enjoy the ability to easily share documents between all project participants.

About Asite

[Asite’s vision](#) is to connect people and help the world build better.

Asite’s open construction platform enables organizations working on [capital projects](#) to come together, plan, design, and build with seamless information sharing across the entire supply chain.

Asite’s comprehensive range of solutions connect dispersed teams across the lifecycle of capital assets, enabling them to build better and build resilience. With Asite, capital project owners stay at the forefront of innovation, maintaining a golden thread of information throughout a project to facilitate the creation of digital twins.
